Background: In the 2006 transportation budget, the Joint Transportation Committee (JTC) was directed to conduct a study of the Washington State Ferries (WSF). The study was to facilitate legislative policy discussions and decisions regarding WSF. In 2007 the Legislature passed ESHB 2358, which implemented the recommendations of that study. Phase Two of the JTC study was continued in the 2007 transportation budget. The Transportation Commission is directed to adopt the WSF capital plan.

Summary of Bill (Recommended Substitute): Recommendations from the 2007 JTC ferry study are implemented. WSF is directed to develop and maintain a vessel rebuild and replacement plan and a vessel deployment plan which must be included in the department's capital plan. WSF is also directed to develop and maintain a vessel maintenance and preservation program, which must include, at a minimum, certain activities, efficiencies by reducing dry-docking times, and reporting requirements. The Transportation Commission is no longer directed to adopt the WSF capital plan, but rather to review it and report to the transportation committees of the Legislature.

EFFECT OF CHANGES MADE BY TRANSPORTATION COMMITTEE (Recommended Substitute): The original bill did not change the Transportation Commission's role with regard to the WSF capital plan.

This analysis was prepared by non-partisan legislative staff for the use of legislative members in their deliberations. This analysis is not a part of the legislation nor does it constitute a statement of legislative intent.

Staff Summary of Public Testimony on Original Bill: PRO: Maintenance and preservation needs to be a top priority at ferries.
